Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner and applicant discussed a typographical error in the previous final action that indicated a citation and teaching from the improper secondary reference (stated as Gerber, should have been Sampson). It was agreed that a supplemental final action would be mailed and the date of the final action would be reset to the date of the supplemental action. Discussion pertained to differences in the beam emitting structure (single versus plural), and also differences in the use of the product in method claims. It was noted that inclusion of process limits pertaining to use as a firefighting apparatus teaching specific safety from descending (or variable) heat zones could be features to potentially distinguish over the prior art of record. No agreement as to patentability was reached.
